The Sterling Silver mill continues to run in a satisfactory manner. The flow of water continues as strong as when first struck.

It is rumored that another "organ" is soon to be started in Phenix. It will probably meet the fate of the late deceased Tribune.

Miss Berry Wood, the canary of the season, has arrived in this city and can be found at the Crystal Palace concert hall to-night. This is the first of the kind in Tombstone for a couple of years and will be welcomed by our citizens generally. The proprietor is always up with the times and this new departure is but one of the many contemplated for the near future.

Is There Anything New Under the Sun?

It has been discovered that the idea of the "drop a nickel in the slot boxes" is older than Christianity. In the Egyptian temples devices of this kind were used for automatically dispensing the purifying water. A can of 5 drops dropped in a slit in a vase set a simple piece of mechanism like a well-sweep in motion, a valve was opened for a instant and a portion of the liquid was permitted to escape. The apparatus is described in the "Spiritualia" of Heron of Alexandria, who lived 200 years before the Christian era, and is illustrated in the 16th century Latin manuscript translations of his work, in which, by the way, is also delineated the Egyptian fire engine of the author's day, with its double force-pump valves, lever arms, goose neck and probably, too, air chamber—but this is a mooted point—which form the essential feature of the machine of the 19th century.—Mining Industry, Denver, Colorado.

If the supervisors would offer the reward authorized by the last Legislature for a stream of artesian water no doubt a sufficient supply would soon be tapped to irrigate thousands of acres of good soil. When once a start is made good results are sure to follow.

It turns out to be true that the two Mexican horse thieves, brought here from Apache county, Arizona, two weeks ago and sent to Socorro county for trial were lynched at Kelly.—Gallup (N. M.) News-Register.

The three St. Louis brothers, A. J. Watts, Tom Blake, Henry Weather-spoon and Martin Nelson, accompanied by a load of supplies from the Cochise H. & T. Co., left yesterday for Sonora to work on the new mill of the Oco Negro company. Tom Blake is head carpenter.

A large crowd gathered at the Crystal Palace concert hall last evening to welcome the new singer. She is a very fair performer on the piano and her voice is above the average. She is a charming addition to the hall and her audience showed its appreciation by frequent and vociferous applause. She will appear at the same place to-night.

Last evening three musicians arrived from Nogales and rendered several selections that were a revelation to those present. Their music is far superior to any now in this city and as Protection hose company is soon to give a social why not have it now and have music that everybody can dance to?

Something new for the benefit of our citizens is to be inaugurated by C. D. Gage & Co. A railroad ticket office is to be established in this city, where through tickets to all points in the United States can be purchased. Most of the material has been received and the enterprise is an assured fact. Mr. Scribner, Wells, Fargo & Co's agent, is interested.

The atmosphere was very cool and pleasant yesterday, the thermometer only reaching 90, and then only for about half an hour. Heavy clouds surrounded this city most of the day and considerable rain fell on the surrounding mountains. The highest speed reached by the wind was five and three-quarter miles per hour.

Several parties will go to the Huachuca Sunday and probably get wet, lose their lunch, fall out of a tree, return through lodo too thick to swim in and too thin to walk on, get swamped when cruzando the San Pedro river, arrive at home some time next morning wet, muddy, hambriento and thirsty and tell their friends they had an infernal tempo.

COUNTY RECORDS.

The following were filed in the County Recorder's office yesterday:

DEED.

C. S. Haeffner and wife to Martin Costello, lot 9, block 32, Tombstone; \$500. Dated August 6.

The Grand Cañon of the Colorado that is attracting so many visitors from Flagstaff and other places, not only in Arizona, but from different parts of the United States, is said to be 298 miles long, and the walls in places rise in stupendous grandeur, to a height of six thousand feet. It is wonderful to contemplate the myriads of years that have passed away while the mad roaring waters have cut their way through the rock, thus forming the most gigantic chasm on earth. The mind of the visitor wanders into forgetfulness while the eye is carried to almost fathomless depths, in taking a view of God's most wonderful piece of nature's beauties. When the magnitude, the grandeur and the loveliness of nature are all spread out in a panorama of beauty, where with one glance of the eye the observer can grasp such stupendous sights, should travel miles to behold the Grand Cañon.—Flagstaff Democrat.

Deputy Sheriff Charley Walker yesterday arrested G. W. Buford in the Dragoon mountains, on a warrant issued out of Justice Easton's court last Tuesday night. The complaint was made by Charley Walker and stated that Buford had placed his brand over and nearly obliterated Walker's brand on a three-year-old heifer, without the knowledge and consent of the plaintiff, and the value of the animal was \$20. The defendant gave bonds of \$300 to appear before Justice Easton for trial next Monday at 2 p. m.

Some Mexicans captured an alligator in the Yaqui river, and brought it to Guaymas, where it was on exhibition for several days. After the curiosity wore off, the owner killed it, on account of its enormous appetite, saying that it would bankrupt the whole State of Sonora to feed it a year. This is the first and only alligator ever known to have been seen in the Yaqui river.—Nogales Herald.

There are more interesting archaeological remains within a circuit of twenty miles of Gallup than in the same area anywhere on earth outside of New Mexico and Arizona, and yet both Territories have thousands of square miles of ancient ruins that are unexcelled on earth for evidences of the presence of pre-historic man.—Gallup (N. M.) Register.

The engineer and train men who pull between Tucson and Yuma say the trip from Yuma to Tucson, which is all made during the sunlight, is unsurpassed in any part of the earth or under the earth. They have to open the furnace door to cool off the air from the desert, it is so hot, and no let up.—Star.

The Iron Duke to His Soldiers.

"Do your duty," were the words of Lord Wellington to his soldiers just before the battle of Waterloo and history tells us how well they obeyed. The same advice might properly be given to every living man at this time. There are many men who would do their whole duty in time of war or great need, but when there is no such great occasion, neglect their plain simple duties to their God, their families and themselves. It is not for want of honor nor because they do not love their families, but from pure neglect; as an instance, statistics compiled by the national authorities show that more deaths result from bowel complaints than any other one cause, except consumption, yet not more than one family in six are provided with medicines that will relieve or cure the diseases. It is the duty of every man to protect their families, and they are certainly at least, guilty of criminal carelessness if they neglect to do so. The best remedy there is for the purpose only costs but 25 cents. The article we refer to is Chamberlain's Colic, Cholera and Diarrhea Remedy. It is a certain cure for cramps, colic, cholera morbus, dysentery, diarrhea, bloody flux, cholera infantum, and bowel complaint in all its forms. For sale by H. J. Peto.

Tourists.

The best way to stop Harris, the tailor, from talking, is to order a suit of clothes from him.

And now they say that when a man buys a San Pedro town lot for three or four hundred dollars, he can wash out \$1,000 in his back lot and his wife can pick \$10 nuggets out of the craws of the chickens she kills for Sunday dinners.—Gallup (N. M.) News-Register.

"I want whiskey, and I want it bad," said an old soak recently to a Mohave county barkeeper. "You can have it as bad as you want it," replied the barkeeper as he passed him out the worst in the house.—Mohave Miner.

Idleness is a Dangerous Fault

In the kidneys. When inactive they speedily fall into despair. Those obstinate and fatal maladies, Bright's disease and diabetes, ensue with terrible certainty upon the inaction of the organs affected. Catarrh of the bladder, enuresis, gravel and stranguary are also to be apprehended from a partial paralysis of the bladder, of which weakness and sluggishness are the causes. Hostetter's Stomach Bitters is a fine tonic and promoter of activity for the renal organs, and one which can be relied upon to afford them the requisite stimulus without exciting them—an effect to be feared from the unmedicated alcoholic excitant of commerce. A further beneficent effect of the Bitters, by renewing activity of the kidneys, is to enable them to drain from the blood in its passage through them, impurities productive of rheumatism and dropsy. Nervousness, fever and ague, constipation and dyspepsia are conquered by the Bitters.
